/*****
*****
* Sam MedLab - Final Application Code with Digital Store
* Version: 5.0
*
* Description: A comprehensive medical laboratory reference
application featuring a searchable test database,
* a research section, an AI-powered assistant (SAM-GIMS), and a new
Digital Store for medical products.
*
* Instructions for the Developer:
* 1. This is a complete, self-contained React application component.
* 2. Place this entire code inside the main component file (e.g.,
`src/App.jsx`).
* 3. The new "Digital Store" component is a UI/UX representation. The
"Buy Now" buttons
* will require integration with a payment gateway (like Stripe,
PayPal, etc.) and a backend
* service to handle transactions and digital product delivery.
*****
